

Improves Process Performance

### Wrap Seal Quick Repair Kit for pipe leaks

- Repairs under active leak
- Repairs leaks in 30 minutes
- Works on any metal or plastic pipe
- Withstands up to 28 bar and 120°C
- For pipe reinforcement & corrosion protection

### Tom-Pac Mechanical Sealing Compound. Shaft seals for pumps, agitators and valves

The replacement for braided packing and mechanical seals

- Zero leakage
- No cooling water
- On-line maintenance
- Easy to install

### GO Switch Magnetic Limit Switches / Proximity Sensors

For the most demanding plant conditions such as hot (200°C), cold (-40°C), wet, dirty, abusive, corrosive and explosive.

- No physical contact is required, non contact sensing
- Does not require power: no leakage current en no voltage drops
- Only one moving part, with no metal to metal contact
- Can handle high current loads (10A / 120 VAC, 3A / 24 VDC)
- One piece robust construction made of stainless steel,
- Maintenance free
- Simple "Normally open" or "Normally closed"
- Not affected by dust, dirt, moisture (washdown) and most caustics or chemicals
- Can withstand vibrations, shocks and physical abuse
- Waterproof and sub sea options (7000 m)
- Global approvals such as CE, ATEX, UL, CSA, FM, etc.
